Approximate date of commencement of proposed sale to public: From time to time after this registration statement becomes effective.

If any of the securities being registered on this form are to be offered pursuant to dividend or interest reinvestment plans, please check the following box.

If any of the securities being registered on this form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, other than securities offered only in connection with dividend or interest reinvestment plans, check the following box.

If this form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this form is a registration statement pursuant to General Instruction I.D. or a post-effective amendment thereto that shall become effective upon filing with the Commission pursuant to Rule 462(e) under the Securities Act, check the following box.

If this form is a post-effective amendment to a registration statement filed pursuant to General Instruction I.D. filed to register additional securities or additional classes of securities pursuant to Rule 413(b) under the Securities Act, check the following box.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 7(a)(2)(B) of the Securities Act.

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities To Be Registered	Amount To Be Registered(1)	Proposed Maximum Offering Price Per Unit(2)	Proposed Maximum Aggregate Offering Price(2)	Amount of Registration Fee(3)
Class B Common Stock, \$0.01 par value, of the Registrant	848,898	\$3.83	\$3,251,279	\$422.02

- (1) This Registration Statement shall also cover any additional shares of Class B common stock which become issuable by reason of any stock dividend, stock split, recapitalization or other similar transaction effected without the receipt of consideration which results in an increase in the number of the outstanding shares of Class B common stock of the Registrant.
- (2) Computed in accordance with Rules 457(c) under the Securities Act of 1933 (the "Securities Act"), solely for the purpose of calculating the registration fee, and based on the average of the high and the low sale prices of Class B common stock of the Registrant as reported on December 9, 2019 on the Nasdaq Global Select Market.
- (3) Computed in accordance with Section 6(b) under the Securities Act, solely for the purpose of calculating the registration fee.

The Registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the commission, acting pursuant to said section 8(a), may determine.

The information in this prospectus is not complete and may be changed. These securities will not be sold until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and it is not soliciting an offer to buy these securities in any state where the offer or sale is not permitted.

SUBJECT TO COMPLETION, DATED DECEMBER 12, 2019

PROSPECTUS

MARCHEX, INC.

848,898 Shares

Class B Common Stock

This prospectus relates to 848,898 shares of our Class B common stock that may be sold from time to time by the selling stockholders named in this prospectus.

This offering is not being underwritten. The selling stockholders may offer the shares through public or private transactions at the market price for our Class B common stock at the time of the sale, a price related to the market price, a negotiated price or such other prices as the selling stockholders determine from time to time. See “Plan of Distribution” beginning on page 24.

All of the net proceeds from the sale of these shares of Class B common stock will go to the selling stockholders. We will not receive any proceeds from sales of these shares. We will bear the costs relating to the registration of these shares.

Our Class B common stock is quoted on the Nasdaq Global Select Market under the symbol “MCHX.”

You should read this prospectus carefully before you invest.

Investing in our Class B common stock involves substantial risks. See “[Risk Factors](#)” beginning on page 4.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is December , 2019.

SUMMARY

Marchex is a call analytics company that helps businesses connect, drive, measure and convert callers into customers. We deliver data insights and incorporate artificial intelligence (AI)-powered functionality that drives insights and solutions to help companies find, engage and support their customers across voice and text-based communication channels.

We provide products and services for businesses of all sizes that depend on calls, texts and other communication channels to drive sales. Our analytics products can provide actionable intelligence on the major media channels advertisers use to acquire customers over the phone.

Our primary product offerings are:

- **Marchex Call Analytics.** Marchex Call Analytics is an analytics platform for enterprises that depend on inbound phone calls to drive sales, appointments and reservations. Marketers can use this platform to understand which marketing channels, advertisements, search keywords, or other digital marketing advertising formats are driving calls to their business, allowing them to optimize their advertising expenditures across media channels. Marchex Call Analytics also includes technology that can extract data and insights about what is happening during a call and measures the outcome of calls and return on investment. The platform also includes technology that can block robocalls, telemarketers and spam calls to help save businesses time and expense. Marchex Call Analytics data can integrate directly into third-party marketer workflows such as Salesforce, Eloqua, Adobe, DoubleClick Search, Kenshoo, Marin Software, Facebook and Instagram, in addition to other marketing dashboards and tools. Advertisers pay us a fee for each call/text or call/text related data element they receive from calls or texts, including call-based ads we distribute through our sources of call distribution or for each phone number tracked based on pre-negotiated rates.
- **Marchex Speech Analytics.** Marchex Speech Analytics is a product that can enable actionable insights for enterprise, mid-sized and small businesses, helping them understand what is happening on inbound calls from consumers to their business. Marchex Speech Analytics leverages our proprietary and patent pending speech recognition technology. Marchex Speech Analytics incorporates machine and deep learning algorithms and AI-powered conversation analysis functionality that can give customers strategic, real-time visibility into company performance in customer interactions. Marchex Speech Analytics includes customizable dashboards and visual analytics to make it easier for marketers, salespeople and call center teams to realize actionable insights across a growing amount of call data. According to a February 2018 MarketsandMarkets report, the speech analytics market is expected to grow from \$941 million in 2017 to \$2.2 billion by 2022.
- **Text Analytics and Communications.** With the acquisitions of SITA Laboratories, Inc. (d/b/a Callcap) (“Callcap”) and Telmetrics, Inc. (“Telmetrics”) in November 2018, Marchex enables businesses to send and receive text/SMS messages with customers. In addition, the Company can provide insights for businesses on text and messaging interactions to improve the customer experience and accelerate the sales process. According to a 2018 study by MobileSquared, there were 1.67 trillion applications to consumer SMS messages globally with the number expected to rise to 2.8 trillion by 2022. According to a 2017 study from Listrak, 75% of consumers prefer offers from businesses delivered via text and business offers delivered via SMS text marketing had a 97% read-rate.
- **Call Monitoring.** With the acquisition of Callcap and Telmetrics, Marchex provides businesses the ability to have an unbiased view into every inbound or outbound call, from providing a call recording, to offering services to create customized call performance scorecards, both of which can help businesses learn more about their customers and enhance service quality and customer satisfaction. Through these services, businesses can customize the insights they want in order to improve business practices and to grow faster.
- **Marchex Sales Edge.** Launched in August 2019, Marchex Sales Edge incorporates artificial intelligence-based functionality within the product suite that can help enable businesses to understand customer conversations in phone calls and via text, in real-time and at scale, and can help enable businesses to learn how to optimize the sales process in order to take the right actions to win more business. These solutions can arm businesses with the data-driven intelligence they need to deliver on-demand and personalized customer experiences. Marchex Sales Edge products include:
 - **Marchex Sales Edge Local.** Marchex Sales Edge Local is expected to be available by the end of 2019 and is a product for business location managers that analyze phone conversations. Marchex Sales Edge Local can provide performance insights and prioritize leads using intelligent lead scoring and integrating with existing workflows and tools companies use each day, like Salesforce Sales Cloud CRM. This product can help

companies grow their business at each location by prioritizing their best leads, while arming them with tools they can use to train their sales teams.

- **Marchex Sales Edge Enterprise.** Launched in 2019, Marchex Sales Edge Enterprise is a product for corporate managers that can provide conversation performance insights and trends across a brand or network of distributed business locations. The conversational data analyses can provide critical sales insights that can help enterprises boost outcomes across national and regional sales organizations.
- **Marchex Sales Edge Rescue.** Marchex Sales Rescue combines Marchex artificial intelligence and machine learning with conversational call monitoring and scoring services and can alert businesses when potential buyers hang up without making a purchase, or when certain calls did not meet the business' customer service standards. Marchex Sales Rescue can identify in real-time when potential high-value customer prospects engaged in conversations with sales representatives are mishandled in any number of ways, and can give businesses the opportunity to re-engage immediately to capture these potentially lost opportunities, as well as avoid undesired customer experiences.
- **Marchex Omnichannel Analytics Cloud.** Marchex Omnichannel Analytics Cloud leverages the call analytics platform and can provide a single source to marketers to see which media channels are driving phone calls across search, display, video, site, and social media. Our Omnichannel Analytics Cloud products include:
 - **Marchex Search Analytics.** Marchex Search Analytics is a product for search marketers that can drive phone calls from search campaigns. Marchex Search Analytics can attribute inbound phone calls made from paid search ads and landing pages to a keyword. The platform can deliver this data as well as data about call outcomes directly into search management platforms like DoubleClick Search and Kenshoo. According to a June 2016 BIA Kelsey report, mobile calls represent 60% of inbound calls to businesses in 2016. This equals 85 billion global mobile calls annually, a figure that is projected to grow to 169 billion calls by 2020.
 - **Marchex Display and Video Analytics.** Marchex Display and Video Analytics is a product for marketers that buy digital display advertising. Marchex Display and Video Analytics can measure the influence that display advertising has on inbound phone calls so that marketers can better attribute their return on advertising spend for inbound phone calls and delivers this data to marketers in a reporting dashboard. According to a December 2017 eMarketer report, US advertisers are expected to spend nearly \$48 billion in 2018 and are projected to spend \$67 billion in 2021 on display advertising.
 - **Marchex Site Analytics.** Marchex Site Analytics is a product for marketers that can drive phone calls from websites. Marchex Site Analytics can identify which websites are driving calls and provides actionable insights to help marketers understand the customer's journey to their website, what drove them to call, and can enable marketers to better optimize both online and offline.
 - **Marchex Social Analytics.** Marchex Social Analytics is a product for marketers that buy social media advertising. Marchex Social Analytics can help measure the influence social media advertising has on inbound calls from platforms like Facebook or Instagram so marketers can see which posts are working. According to a December 2016 Zenith Media report, global social media is forecasted to grow 72% between 2016 and 2019, rising from \$29 billion to \$50 billion.
- **Marchex Audience Targeting.** Marchex Audience Targeting leverages call data to automatically build unique audience segments for display and social media platforms. Marchex Audience Targeting can help marketers target high intent audiences with their display campaigns and fine-tune campaigns to specific audience segments that are most likely to convert to customers, or can find new segments and opportunities that have not been targeted before.
- **Marchex Call Marketplace.** Marchex Call Marketplace is a mobile advertising network for businesses that depend on inbound phone calls to drive sales. We offer advertisers ad placements across numerous mobile and online media sources to deliver qualified calls to their businesses. It leverages analytics for tracking, reporting and optimization. Advertisers are charged on a pay-per-call or cost per action basis.

- **Local Leads.** Our local leads platform is a white-labeled, full service advertising solution for small business resellers, such as Yellow Pages providers and vertical marketing service providers, to sell call advertising, search marketing and other lead generation products through their existing sales channels to their small business advertisers. These calls and leads are then fulfilled by us across our distribution network, including mobile sources, and search engines. Reseller partners and publishers generally pay us account fees and agency fees for our products in the form of a percentage of the cost of every click or call delivered to their advertisers. Under one of our contracts with Thryv, Inc. (formerly known as Dex Media, Inc., successor in interest to Yellowpages.com LLC) (“Thryv”), we generate revenues from our local leads platform. This local leads platform agreement, which expires December 31, 2019, provides Thryv flexibility to migrate active accounts to itself or a third-party provider prior to the end of an advertiser contract and provides Thryv with certain termination rights upon four months notice. We also have separate pay-for-call services and distribution partner agreements with Thryv and separate reseller partner agreements with Thryv for additional pay-for-call and separate call analytics services. Thryv is our largest reseller partner and was responsible for 25% and 22% of our total revenues for the three and nine months ended September 30, 2018, respectively, and 29% and 27% of our total revenues for the three and nine months ended September 30, 2019, respectively.

In this prospectus, the terms “Marchex,” “company,” “we,” “us” and “our” refer to Marchex, Inc. and its wholly-owned direct and indirect subsidiaries. We were incorporated in the State of Delaware. Our principal executive offices are located at 520 Pike Street, Suite 2000, Seattle, Washington 98101 and our telephone number is (206) 331-3300.

This prospectus relates to 848,898 shares of our Class B common stock that may be sold from time to time by the selling stockholders named in this prospectus. The stockholders are identified in the section headed “Selling Stockholders.” We will not receive any of the proceeds for the resale of these shares.

RISK FACTORS

You should carefully consider the risks described below before making an investment decision regarding our securities. If any of the following risks actually occurs, our business, financial condition and results of operations could be harmed. In that case, the trading price of our Class B common stock could decline and you could lose all or part of your investment. Additional risks not presently known to us or that we currently deem immaterial may also impair our business operations.

Risks Relating to Our Company

We have largely incurred net losses since our inception, and we may incur net losses in the foreseeable future.

We had an accumulated deficit of \$259.8 million as of September 30, 2019. Our net expenses may increase based on the initiatives we undertake which for instance, may include increasing our sales and marketing activities, hiring additional personnel, incurring additional costs as a result of being a public company, acquiring additional businesses and making additional equity grants to our employees. This may result in the reduction of our cash balances or the incurrence of debt.

We have in the past and may in the future find it advisable to take measures to streamline operations and reduce expenses, including, without limitation, reducing our workforce or discontinuing certain products or businesses. Such measures may place significant strains on our management and employees, and could impair our development, marketing, sales, and customer support efforts. We may also incur liabilities from these measures. Such effects from streamlining could have a negative impact on our business and financial results.

We believe that our future revenue growth will depend on, among other factors, our ability to attract new advertisers, compete effectively, maximize our sales efforts, demonstrate a positive return on investment for advertisers, successfully improve existing products and services, and develop successful new products and services. If we are unable to generate adequate revenue growth and to manage our expenses, we may continue to incur significant losses in the future and may not be able to achieve or maintain profitability.

We are dependent on certain distribution partners, for distribution of our services, and we derive a significant amount of our total revenue through these distribution partners. A loss of distribution partners or a decrease in revenue from certain distribution partners could adversely affect our business.

A relatively small number of distribution partners currently deliver a significant percentage of calls and traffic to our advertisers. There was no distribution partner paid more than 10% of total revenues for the for the nine months ended September 30, 2019. Our existing agreements with many of our larger distribution partners permit either company to terminate without penalty on short notice and are primarily structured on a variable-payment basis, under which we make payments based on a specified percentage of revenue or based on the number of paid phone calls or click-throughs. We intend to continue devoting resources in support of our larger distribution partners, but there are no guarantees that these relationships will remain in place over the short-or long-term. In addition, we cannot be assured that any of these distribution partners will continue to generate current levels of revenue for us or that we will be able to maintain the applicable variable payment terms at their current levels. A loss of any of these distribution partners or a decrease in revenue or contribution due to lower calls and traffic or less favorable variable payment terms from any one of these distribution relationships could have a material adverse effect on our business, financial condition and results of operations

Companies distributing advertising through mobile or online Internet have experienced, and will likely continue to experience, consolidation. This consolidation has reduced the number of partners that control the mobile and online advertising outlets with the most user calls and traffic. According to the comScore qSearch analysis of the U.S. desktop search marketplace for August 2019, Verizon Media and Microsoft accounted for 11.5% and 25.2%, respectively, of the core search market in the United States and Google accounted for 62.4%. As a result, the larger distribution partners have greater control over determining the market terms of distribution, including placement of call and click-based advertisements and cost of placement. In addition, many participants in the performance-based advertising and search marketing industries control significant portions of mobile and online traffic that they deliver to advertisers. We do not believe, for example, that Google, Microsoft, and Verizon Media are as reliant as we are on a third-party distribution network to deliver their services. This gives these companies a significant advantage over us in delivering their services, and with a lesser degree of risk.

We rely on certain advertiser reseller partners and agencies, including Thryv, Resolution Media, OMD Digital, CDK Global, hibu Inc., and Web.com for the purchase of various advertising and marketing services, as well as to provide us with a large number of advertisers. A loss of certain advertiser reseller partners and agencies or a decrease in revenue from these reseller partners and agencies could adversely affect our business. Such advertisers are subject to varying terms and conditions, which may result in claims or credit risks to us.

We benefit from the established relationships and national sales teams that certain of our reseller partners, who are leading reseller partners of advertisers and advertising agencies, have in place throughout the U.S. and international markets. These advertiser reseller partners and agencies refer or bring advertisers to us for the purchase of various advertising products and services. We derive a sizeable portion of our total revenue through these advertiser reseller partners and agencies. Additionally, these advertiser reseller partners and agencies may decide to operate the advertising services we perform internally with their own teams and technology. A loss of certain advertiser reseller partners and agencies or a decrease in revenue from these clients could adversely affect our business.

Under one of our contracts with Thryv, Inc. (formerly known as Dex Media, Inc., successor in interest to Yellowpages.com LLC) (“Thryv”), we generate revenues from our local leads platform. This local leads platform agreement expires December 31, 2019 and we expect the remaining active accounts to be migrated or to wind down at that time. The local leads platform agreement provides Thryv flexibility to migrate active accounts to itself or a third-party provider prior to the end of an advertiser contract and provides Thryv with certain termination rights upon four months notice. We expect Thryv may decrease the number of new advertiser accounts with us and may elect to migrate certain active accounts to itself or a third-party provider which would result in fewer small business accounts and related revenues, as well as reduced contribution and profitability. Thryv’s small business account base utilizing our platform has declined, and to the extent declines occur in their business, their small business accounts may spend fewer dollars on our pay-for-call services. We expect Thryv and local leads platform advertisers in future periods will comprise lower total revenues compared to previous periods and Thryv as a percentage of our total revenue may also comprise a smaller percentage of our total revenue. We also have separate pay-for-call services and distribution partner agreements with Thryv and separate reseller partner agreements with Thryv for pay-for-call and call analytics services. Thryv is our largest reseller partner and was responsible for 27% of our total revenues for the nine months ended September 30, 2019. It is possible that changes to our relationship and agreements with Thryv may occur and result in a significant reduction in the paid account fees, agency fees, and per call or lead fees that we receive from Thryv. There can be no assurance that our business with Thryv in the future will continue at or near current revenue and contribution levels, that we will be able to renew and extend the contracts set to expire in December 31, 2019, and if renewed, the contracts are likely to be on less favorable terms to us, any of which could have a material adverse effect on our future operating results.

We also have agreements with advertising agencies, such as Resolution Media and OMD Digital, who act on an advertiser’s behalf and may represent more than one advertiser that utilizes our products and services. Our primary agreements with Resolution Media and OMD Digital are for pay-for-call services whereby we charge an agreed-upon price for qualified calls or leads from our network and call analytic services. Resolution Media and OMD Digital accounted for 10% and less than 10% of total revenues, respectively, for the nine months ended September 30, 2019.

These reseller partners and agencies may in certain cases be subject to negotiated terms and conditions separate from those applied to advertising clients. In some cases, the applicable contract terms may be the result of legacy or industry association documentation or simply customized advertising solutions for large reseller partners and agencies. In any case, as a consequence of such varying terms and conditions, we may be subject to claims or credit risks that we may otherwise mitigate more efficiently across our automated advertiser management platform.

These claims and risks may vary depending on the nature of the aggregated client base. Among other claims, we may be subject to disputes based on third-party tracking information or analysis. We may also be subject to differing credit profiles and risks based on the agency relationship associated with these advertisers. For such advertisers, payment may be made on an invoice basis. In some limited circumstances, we may also have accepted individual advertiser payment liability in place of liability of the advertising agency or media advisor.

We received approximately 51% and 48% of our revenue from our five largest customers for the year ended December 31, 2018 and the nine months ended September 30, 2019, respectively, and the loss of one or more of these customers could adversely impact our results of operations and financial condition.

Our five largest customers accounted for approximately 51% and 48% of our total revenues for the year ended December 31, 2018 and the nine months ended September 30, 2019, respectively. Thryv was responsible for 27% of our total revenues for the nine months ended September 30, 2019.

We have agreements with Resolution Media and OMD Digital, who act as agents on advertisers’ behalf, for pay-for-call services whereby we charge an agreed upon price for qualified calls or leads from our network and call analytic services. A single advertiser, State Farm who utilizes our services primarily through Resolution Media and OMD Digital, accounted for 12% of total

revenues for the nine months ended September 30, 2019. We expect in the near term campaign spend levels related to State Farm to be higher compared to previous quarters.

Many of our other large customers, including reseller partners, and advertising agencies are not subject to long term contracts with us or have contracts with near term expiration dates, and are able to reduce or cease advertising spend at any time and for any reason. Reseller partners purchase various advertising and marketing services from us, as well as provide us with a large number of advertisers. A loss of reseller partners or a decrease in revenue from these resellers could adversely affect our business. In some cases, we engage with advertisers through advertising agencies, who act on behalf of the advertisers. Advertising agencies, such as Resolution Media and OMD Digital, may place insertion orders with us on behalf of advertisers (including State Farm) for particular advertising campaigns, which are typically short term and subject to a specified dollar amount, and are not obligated to commit beyond the campaign governed by a particular insertion order and may also cancel the campaign prior to completion. Advertising agencies also have relationships with many different providers, each of whom may be running portions of the advertising campaign. We have call advertising agreements with certain large customers, which provide flexibility around financial commitments, termination rights, indemnification, and security obligations. Our large customers may vary spend levels and there can be no assurances that our large customers will continue to spend at levels similar to prior quarters. If any of our largest customers are acquired, such acquisition may impact its advertising spending or budget with us, including due to rebranding, change in advertising agency, or change in media tactics. A significant reduction in advertising spending or budgets by our largest customers, or the loss of one or more of these customers, if not replaced by new customers or an increase in business from existing customers, would have a material adverse effect on our future operating results.

Our large customers have substantial negotiating leverage, which may require that we agree to terms and conditions that may have an adverse effect on our business.

Our large customers have substantial purchasing power and leverage in negotiating contractual arrangements with us. These customers may seek for us to develop additional features, may require penalties for failure to deliver such features, may seek discounted product or service pricing, and may seek more favorable contractual terms. As we sell more products and services to this class of customer, we may be required to agree to such terms and conditions. Such large customers also have substantial leverage in negotiating resolution of any disagreements or disputes that may arise. Any of the foregoing factors could result in a material adverse effect on our business, financial condition and results of operations.

If some of our customers experience financial distress or suffer disruptions in their business, their weakened financial position could negatively affect our own financial position and results.

We have a diverse customer base and, at any given time, one or more customers may experience financial distress, file for bankruptcy protection, go out of business, or suffer disruptions in their business. If a customer with whom we do a substantial amount of business experiences financial difficulty or suffers disruptions in their business, it could delay or jeopardize the collection of accounts receivable, result in significant reductions in services provided by us and may have a material adverse effect on our results of operations and liquidity.

We may incur liabilities for the activities of our advertisers, reseller partners, distribution partners and other users of our services, which could adversely affect our business.

Many of our advertisement distribution processes are automated. In some cases, advertisers or reseller partners use our online tools and account management systems to create and submit advertiser listings, and in other cases, we create and submit advertising listings on behalf of our advertisers or reseller partners using the distribution partners' user interface. Although we monitor our distribution partners on an ongoing basis primarily for traffic quality, these partners control the distribution of the advertiser listings provided in the user interface submissions.

We have a large number of distribution partners who display our advertiser listings on their networks. Our advertiser listings are delivered to our distribution partners in an automated fashion through the distribution partners' user interface. Our distribution partners are contractually required to use the listings created by our advertiser customers in accordance with applicable laws and regulations and in conformity with the publication restrictions in our agreements, which are intended to promote the quality and validity of the traffic provided to our advertisers. Nonetheless, we do not operationally control or manage these distribution partners or third parties they may contract with and any breach of these agreements on the part of any distribution partner or its affiliates could result in liability for our business. These agreements include indemnification obligations on the part of our distribution partners, but there is no guarantee that we would be able to collect against offending distribution partners or their affiliates in the event of a claim under these indemnification provisions. Alternatively, we may incur substantial costs as part of our indemnification obligations to distribution partners for liability they may incur as a result of displaying content we have provided them. Any costs incurred as a result

of activities of our distribution partners and their third-party partners could have a material adverse effect on our business, operating results and financial condition.

We do not conduct a manual editorial review of a substantial number of the advertiser listings directly submitted by advertisers or reseller partners online, nor do we manually review the display of the vast majority of the advertiser listings by our distribution partners submitted to us by the distribution partners' user interface. Likewise, in cases where we provide editorial or value-added services for our large reseller partners or agencies, such as ad creation and optimization for local advertisers or landing pages and micro-sites for pay-for-call customers, we rely on the content and information provided to us by these agents on behalf of their individual advertisers. We do not investigate the individual business activities of these advertisers other than the information provided to us or in some cases review of advertiser websites. We may not successfully avoid liability for unlawful activities carried out by our advertisers or reseller partners and other users of our services or unpermitted uses of our advertiser listings by distribution partners and their affiliates.

Our potential liability for unlawful activities of our advertisers and other users of our services or unpermitted uses of our advertiser listings and advertising services and platform by distribution partners and reseller partners and agencies could require us to implement measures to reduce our exposure to such liability, which may require us, among other things, to spend substantial resources, to discontinue certain service offerings or to terminate certain distribution partner relationships. For example, as a result of the actions of advertisers in our network, we may be subject to private or governmental actions relating to a wide variety of issues, such as privacy, data security, gambling, promotions, and intellectual property ownership and infringement. Under agreements with certain of our larger distribution partners, we may be required to indemnify these distribution partners against liabilities or losses resulting from the content of our advertiser listings, or resulting from third party intellectual property infringement claims. Although our advertisers agree to indemnify us with respect to claims arising from these listings, we may not be able to recover all or any of the liabilities or losses incurred by us as a result of the activities of our advertisers.

Our insurance policies may not provide coverage for liability arising out of activities of users of our services. In addition, our reliance on some content and information provided to us by our large advertiser reseller partners and agencies may expose us to liability not covered by our insurance policies. Furthermore, we may not be able to obtain or maintain adequate insurance coverage to reduce or limit the liabilities associated with our businesses. Any costs incurred as a result of such liability or asserted liability could have a material adverse effect on our business, operating results and financial condition.

If we do not maintain and grow a critical mass of advertisers and distribution partners, the value of our services could be adversely affected.

Our success depends, in large part, on the maintenance and growth of a critical mass of advertisers and distribution partners and a continued interest in our call analytics, pay-for-call, performance-based advertising, and search marketing services. Advertisers will generally seek the most competitive return on investment from advertising and marketing services. Distribution partners will also seek the most favorable payment terms available in the market. Advertisers and distribution partners may change providers or the volume of business with a provider, unless the product and terms are competitive. In this environment, we must compete to acquire and maintain our network of advertisers and distribution partners. If our business is unable to maintain and grow our base of advertisers, our current distribution partners may be discouraged from continuing to work with us, and this may create obstacles for us to enter into agreements with new distribution partners. Our business also depends in part on certain of our large reseller partners and agencies to grow their base of advertisers as these advertisers become increasingly important to our business and our ability to attract additional distribution partners and opportunities. Similarly, if our distribution network does not grow and does not continue to improve over time, current and prospective advertisers and reseller partners and agencies may reduce or terminate this portion of their business with us. Any decline in the number of advertisers and distribution partners could adversely affect the value of our services.

The mobile advertising market may develop more slowly than expected, which could harm our business.

If the market for mobile marketing and advertising develops more slowly than we expect, our business could suffer. Our future success is highly dependent on the commitment of advertisers and marketers to mobile communications as an advertising and marketing medium, the willingness of our potential advertisers to outsource their mobile advertising and marketing needs, and our ability to sell our mobile advertising services to reseller partners and agencies. The mobile advertising and marketing market is rapidly evolving. Businesses, including current and potential advertisers, may find mobile advertising or marketing to be less effective than traditional advertising media or marketing methods or other technologies for promoting their products and services. As a result, the future demand and market acceptance for mobile marketing and advertising is uncertain. Many of our current or potential advertisers may have little or no experience using mobile communications for advertising or marketing purposes and have allocated only a limited portion of their advertising or marketing budgets to mobile communications advertising or marketing, and there is no certainty that they will allocate more funds in the future, if any. Funds to these types of campaigns may fluctuate greatly as different agencies and advertisers test and refine their overall marketing strategies to include mobile advertising and analytics tools. The adoption rate and budget commitments may vary from period to period as agencies and advertisers determine the appropriate mix of media and lead sources in short and long term campaigns.

We are dependent upon the quality of mobile, online, offline and other traffic sources in our network to provide value to our advertisers and the advertisers of our reseller partners and agencies, and any failure in our quality control could have a material adverse effect on the value of our services to our advertisers and adversely affect our revenues.

We utilize certain monitoring processes with respect to the quality of the mobile, online, offline and other traffic sources that we deliver to our advertisers. Among the factors we seek to monitor are sources and causes of low quality phone calls such as unwanted telemarketer calls or other actions such as non-human processes, including robots or robocallers, spiders or other software, the mechanical automation of calling, and other types of invalid calls, call fraud, or call spam, the purpose of which is something other than to view the underlying content. Similarly, our network service providers may adopt new filtering technologies in an effort to combat spam or robocalling. Such technologies may inadvertently filter desired messages or calls to or from our customers. Additionally, we also seek to identify other indicators which may suggest that a user may not be targeted by or desirable to our advertisers. Even with such monitoring in place, there is a risk that a certain amount of low quality mobile, online, offline and other traffic or traffic that is deemed to be less valuable by our advertisers will be delivered to such advertisers, which may be detrimental to those relationships. We have regularly refunded fees that our advertisers had paid to us which were attributed to low quality mobile, online, offline and other traffic. If we are unable to stop or reduce low quality phone calls and Internet traffic, these refunds may increase. Low quality mobile, online, offline and other traffic may further prevent us from growing our base of advertisers and cause us to lose relationships with existing advertisers, or become the target of litigation, both of which would adversely affect our revenues.

We depend on being able to secure enough phone numbers to support our advertisers and other users of our services and any obstacles that we face which prevent us from meeting this demand could adversely affect our business.

We utilize phone numbers as part of a number of information and analytic services to advertisers, such as our call analytics, call tracking, and pay-for-call services. Our services that utilize phone numbers are designed to enable advertisers and other users of our services to utilize mobile, online and offline advertising and to help measure the effectiveness of mobile, online and offline advertising campaigns. We secure a majority of our phone numbers through telecommunication carriers that we have contracted with and a smaller number through the 800 Service Management System, and such telecommunication carriers provide the underlying telephone service. Our telecommunications carriers and telephone number acquisition process are subject to the rules and guidelines established by the Federal Communications Commission. Furthermore, to the extent we offer call recording and pay-for-call services, we may be directly subject to certain telecommunications-related regulations. The Federal Communications Commission and our telecommunication carriers may change the rules and guidelines for securing phone numbers or change the requirements for retaining the phone numbers we have already secured. As a result, we may not be able to secure or retain sufficient phone numbers needed for our services. We may also be limited in the number of available telecommunications carriers or vendors to provide such phone numbers to us in the event of any industry consolidations.

Our automated voice and mobile advertising-based technologies are heavily reliant on vendors.

Certain voice and mobile advertising-based products are heavily reliant on vendors. The free directory product that we provide relies on technology provided by third party vendors that include voice recognition software and business, government and residence data listings. We cannot guarantee that the technology, data and services provided by our third-party vendors will be of sufficient quality to meet the demands of our customers and partners. Further, we cannot guarantee that the technologies, data and services will be available to us in the future on acceptable terms, if at all. Any perception by our customers or partners that our voice and mobile advertising-based products are incomplete or not of sufficient quality could lead to a loss in confidence by our customers or partners, which in turn could lead to a decline in revenues. If we are unable to continue maintaining, advancing and improving our voice and mobile advertising-based products, our operating results may be adversely affected.

Our business strategy is evolving and may involve pursuing new lines of business or strategic transactions and investments, some of which may not be successful.

Our industry is undergoing significant change and our business strategy is continuing to evolve to meet these changes. In order to profitably grow our business, we may need to expand into new lines of business beyond our current focus of providing call analytics and advertising products and services, which may involve pursuing strategic transactions, including potential acquisitions of, or investments in, related or unrelated businesses. In addition, we may seek divestitures of existing businesses or assets. There can be no assurance that we will be successful with our efforts to evolve our business strategy and we could suffer significant losses as a result, which could have a material adverse effect on our business, financial condition and results of operations.

Our recent investment in a new business may not be successful.

We have recently made a majority equity investment in a newly established company which intends to enable businesses to offer regular car service primarily as an employee benefit. This business model is unrelated to our current focus of providing conversational analytics and sales enablement solutions. This new business is subject to the various risk factors associated with any early stage company. In addition, we are reliant on the management team of this new business in overseeing its day to day operations. There can be no assurance that this new business will be successful in achieving its business model or if ultimately successful the timing of any such success or that our investment will prove to be profitable.

Our acquisitions could divert management's attention, cause ownership dilution to our stockholders, cause our earnings to decrease and be difficult to integrate.

Our business strategy includes identifying, structuring, completing and integrating acquisitions. Acquisitions involve a high degree of risk. We may also be unable to find a sufficient number of attractive opportunities to meet our objectives which include revenue growth, profitability and competitive market share. Our acquired companies may have histories of net losses and may expect net losses for the foreseeable future. Acquisitions are accompanied by a number of risks that could harm our business, operating results and financial condition:

- We could experience a substantial strain on our resources, including time and money, and we may not be successful;
- Our management's attention could be diverted from our ongoing business concerns;
- We may seek to enter new markets where we have no or limited experience or where competitors may have stronger market positions;
- Integrating new companies, including Telmetrics and Callcap, may take longer than expected;
- While integrating new companies, we may lose key executives or other employees of these companies;
- We may issue shares of our Class B common stock as consideration for acquisitions which may result in ownership dilution to our stockholders;
- Acquisitions of certain companies may result in us pursuing a diversified operating or holding company structure to allow us to focus on running diverse businesses independently, but in such event we may not realize the anticipated strategic benefits;
- We could fail to successfully integrate our financial and management controls, technology, reporting systems and procedures, or adequately expand, train and manage our workforce;
- We could experience customer dissatisfaction or performance problems with an acquired company or technology;
- We could become subject to unknown or underestimated liabilities of an acquired entity or incur unexpected expenses or losses from such acquisitions, including litigation;
- We could incur possible impairment charges related to goodwill or other intangible assets resulting from acquisitions or other unanticipated events or circumstances, any of which could harm our business; and
- We may be exposed to investigations and/or audits by federal, state or other taxing authorities.

Consequently, we might not be successful in integrating any acquired businesses, products or technologies, and might not achieve anticipated revenue and cost benefits.

We may decide to dispose of assets or a business that may no longer help us meet our objectives.

If we decide to sell assets or a business, we may encounter difficulty in finding buyers or alternative exit strategies on acceptable terms in a timely manner, which could delay the achievement of our strategic objectives. We may also dispose of a business at a price or on terms that are less desirable than we had anticipated. In addition, we may experience greater disruption to our remaining business than expected, and the impact of the divestiture on our revenue may be larger than projected.

Our international operations and any expansion subjects us to additional risks and uncertainties and we may not be successful with our international operations.

We have operations in Canada through Telmetrics and through our international subsidiaries, in other countries. We have international subsidiaries in Canada, Ireland, and the United Kingdom. Any international expansion presents unique challenges and risks. Compliance with complex foreign and U.S. laws and regulations that apply to our international operations increases our cost of doing business in international jurisdictions and could interfere with our ability to offer our products and services to one or more countries or expose us or our employees to fines and penalties. We may also have to offer our products and services in a modified format which may not be as compelling to certain customers, and we are subject to increased foreign currency exchange rate risks and our international operations and any expansion will require additional management attention and resources. We cannot assure you that we will be successful in our international operations. There are risks inherent in conducting business in international markets, including:

- the need to localize our products and services to foreign customers' preferences and customs, including the possibility of storing data locally if customers require;
- difficulties in managing operations due to language barriers, distance, staffing and cultural differences;
- application of foreign laws and regulations to us, in particular data and privacy regulations in Europe and other international jurisdictions, including the EU General Data Protection Regulation which went into full force and effect in May 2018 and which supersedes the current EU data protection regulation, which continue to change and impose significantly more liability and product limitations on service providers in our industry;
- compliance with anti-bribery laws, such as the Foreign Corrupt Practices Act and the UK Anti-Bribery Act;
- tariffs and other trade barriers;
- fluctuations in currency exchange rates;
- establishing local offices, sales channels, management systems and infrastructures;
- reduced protection for intellectual property rights in some countries;
- changes in foreign political and economic conditions;
- compliance with the laws of numerous taxing jurisdictions, both foreign and domestic;
- foreign exchange controls that might prevent us from repatriating cash earned outside the United States;
- the complexity and potentially adverse tax consequences of U.S. tax laws as they relate to our international operations;
- increased costs to establish and maintain effective controls at foreign locations; and
- overall higher costs of doing business internationally.

Our failure to address these risks adequately could materially and adversely affect our business, revenue, results of operations and financial condition.

We may be subject to intellectual property claims, which could adversely affect our financial condition and ability to use certain critical technologies, divert our resources and management attention from our business operations and create uncertainty about ownership of technology essential to our business.

Our success depends, in part, on our ability to operate without infringing on the intellectual property rights of others. There can be no guarantee that any of our intellectual property will not be challenged by third parties. We may be subject to patent infringement claims or other intellectual property infringement claims, and claims of copyright infringement with respect to certain of our websites that would be costly to defend and could limit our ability to use certain critical technologies. Our call advertising business increases the potential intellectual property infringement claims we may be subject to, particularly in light of the large number of patents which have been issued (or are pending) in the telecommunications field over the last several decades, both in the U.S. and internationally.

We believe that a consolidation of patent portfolios by major technology companies and independent asset holding companies will increase the chances of aggressive assertions of patent and other intellectual property claims. Within the technology telecommunications and online sectors, among other related sectors, we have witnessed various claim holders and alleged rights holders pursue business strategies devoted to extracting settlements or license fees for a wide range of basic and commonly accepted methods and practices. We may be subject to those intellectual property claims in the ordinary course of our business. Also, our partners and customers may also find that they are subject to similar claims, in which case we may be included in any related process or dispute settlement. Any patent or other intellectual property litigation could negatively impact our business by diverting resources and management attention from other aspects of the business and adding uncertainty as to the ownership of technology, services and property that we view as proprietary and essential to our business. In addition, a successful claim of patent infringement against us and our failure or inability to license the infringed or similar technology on reasonable terms, or at all, could prevent us from using critical technologies which could have a material adverse effect on our business.

We may need additional funding to meet our obligations and to pursue our business strategy. Additional funding may not be available to us and our financial condition could therefore be adversely affected.

We may require additional funding to meet our ongoing obligations and to pursue our business strategy, which may include the selective acquisition of businesses and technologies. In addition, we have incurred and we may incur certain obligations in the future. There can be no assurance that, if we were to need additional funds to meet these obligations, additional financing arrangements would be available in amounts or on terms acceptable to us, if at all. Furthermore, if adequate additional funds are not available, we will be required to delay, reduce the scope of, or eliminate material parts of the implementation of our business strategy, including potential additional acquisitions or internally-developed businesses.

The loss of our senior management, including other key personnel, could harm our current and future operations and prospects.

We are heavily dependent upon the continued services of members of our senior management team and other key personnel. Each member of our senior management team and other key personnel are at-will employees and may voluntarily terminate his or her employment with us at any time with minimal notice. Following any termination of employment, each of these members would only be subject to a twelve-month non-competition and non-solicitation obligation with respect to our customers and employees under our standard confidentiality agreement. The loss of the services of any member of our senior management, including other key personnel, for any reason, or any conflict among our senior management or other key personnel, could harm our current and future operations and prospects.

We have experienced turnover in certain senior executives in recent years. Additional turnover at the senior management level may create instability within the Company and our employees may decide to terminate their employment, which could further impede the maintenance of our day to day operations. Such instability could impede our ability to implement fully our business plan and growth strategy, which would harm our business and prospects.

We may have difficulty retaining current personnel as well as attracting and retaining additional qualified, experienced, highly skilled personnel, which could adversely affect the implementation of our business plan.

Our performance is largely dependent upon the talents and efforts of highly skilled individuals. In order to fully implement our business plan, we will need to retain our current qualified personnel, as well as attract and retain additional qualified personnel. Thus, our success will, in significant part, depend upon our retention of current personnel as well as the efforts of personnel not yet identified and upon our ability to attract and retain highly skilled managerial, engineering, sales and marketing personnel. We are also dependent on managerial and technical personnel to the extent they may have knowledge or information about our businesses and technical systems that may not be known by our other personnel. There can be no assurance that we will be able to attract and retain necessary personnel. The failure to hire and retain such personnel could adversely affect the implementation of our business plan.

If we are unable to obtain and maintain adequate insurance, our financial condition could be adversely affected in the event of uninsured or inadequately insured loss or damage. Our ability to effectively recruit and retain qualified officers and directors may also be adversely affected if we experience difficulty in maintaining adequate directors' and officers' liability insurance.

We may not be able to obtain and maintain insurance policies on terms affordable to us that would adequately insure our business and property against damage, loss or claims by third parties. To the extent our business, property or systems suffer any damages, losses or claims by third parties that are not covered or adequately covered by insurance, our financial condition may be materially adversely affected. We currently have directors' and officers' liability insurance. If we are unable to maintain sufficient insurance as a public company to cover liability claims made against our officers and directors, we may not be able to retain or recruit qualified officers and directors to manage our company, which could have a material adverse effect on our operations.

It may be difficult for us to retain or attract qualified officers and directors, which could adversely affect our business and our ability to maintain the listing of our Class B common stock on the NASDAQ Global Select Market.

We may be unable to attract and retain qualified officers, directors and members of board committees required to provide for our effective management as a result of changes in the rules and regulations which govern publicly-held companies, including, but not limited to, certifications from executive officers and requirements for financial experts on boards of directors. The perceived increased personal risk associated with these changes may deter qualified individuals from accepting these roles. Further, applicable rules and regulations of the Securities and Exchange Commission and the NASDAQ Stock Market heighten the requirements for board or committee membership, particularly with respect to an individual's independence from the corporation and level of experience in finance and accounting matters. We may have difficulty attracting and retaining directors with the requisite qualifications. If we are unable to attract and retain qualified officers and directors, our business and our ability to maintain the listing of our shares of Class B common stock on the NASDAQ Global Select Market could be adversely affected.

If we fail to maintain an effective system of internal controls, we may not be able to accurately report our financial results or prevent fraud, which could harm our brand and operating results.

Effective internal controls are necessary for us to provide reliable and accurate financial reports and effectively prevent fraud. We have devoted significant resources and time to comply with the internal control over financial reporting requirements of the Sarbanes-Oxley Act of 2002. In addition, Section 404 under the Sarbanes-Oxley Act of 2002 requires that we assess and our auditors attest to the effectiveness of our controls over financial reporting. Our current and future compliance with the annual internal control report requirement will depend on the effectiveness of our financial reporting and data systems and controls across our operating subsidiaries. We expect these systems and controls to become increasingly complex to the extent that we integrate acquisitions and our business grows. To effectively manage this growth, we will need to continue to improve our operational, financial and management controls and our reporting systems and procedures. We cannot be certain that these measures will ensure that we design, implement and maintain adequate controls over our financial processes and reporting in the future. Any failure to implement required new or improved controls, or difficulties encountered in their implementation or operation, could harm our operating results or cause us to fail to meet our financial reporting obligations. Inadequate internal controls could also cause investors to lose confidence in our reported financial information, which could have a negative effect on the trading price of our stock and our access to capital.

The Tax Cuts and Jobs Act of 2017 could adversely affect our business and financial condition.

On December 22, 2017, the U.S. government enacted comprehensive Federal tax legislation commonly referred to as the Tax Cuts and Jobs Act of 2017 (the "Tax Act"). The Tax Act, among other changes, makes a U.S. federal net operating loss less valuable as an asset due to a new flat U.S. federal corporate income tax rate of 21%, replacing a graduated rate with a maximum income tax rate of 35%, effective January 1, 2018 and the elimination of the corporate alternative minimum tax for taxable years beginning after December 31, 2017. The alternative minimum tax credit carryforward is refundable for any taxable year beginning after 2017 and before 2022 in an amount equal to 50% (100% in the case of taxable years beginning in 2021) of the excess of the minimum tax credit for the taxable year over the amount of the credit allowable for the year against regular tax liability. Net operating losses arising in taxable years beginning after December 31, 2017 are limited in use to offset eighty percent of taxable income, without the ability to carryback such net operating losses, but with an indefinite carryforward of such losses (instead of the former 2-year carryback and 20-year carryforward for net operating losses arising in taxable years beginning before December 31, 2017). The amount of the net interest expense deduction is generally limited to (a) 30% of adjusted taxable income, calculated without regard to depreciation, amortization or depletion, effective for tax years beginning after December 31, 2017 and before January 1, 2022 and (b) 30% of net interest expense exceeding earnings before income taxes (reduced by depreciation, amortization and depletion), effective for tax years beginning after January 1, 2022. Disallowed amounts may be carried forward indefinitely, subject to ownership change limitations. We continue to examine the impact this tax reform legislation may have on our business. Notwithstanding the reduction in the corporate income tax rate, the overall impact of the Tax Act is uncertain and our business and financial condition could be adversely affected.

We may experience unforeseen liabilities arising out of third-party domain names included in our distribution network, which could negatively impact our financial results.

We display pay-for-call listings on third party domain names and third-party websites that are part of our distribution network, which could subject us to a wide variety of civil claims including intellectual property ownership and infringement. The potential violation of third party intellectual property rights and potential causes of action under consumer protection laws may subject us to unforeseen liabilities including injunctions and judgments for money damages.

We may face risks related to litigation that could result in significant legal expenses and settlement or damage awards.

From time to time, we are subject to claims and litigation, which could seriously harm our business and require us to incur significant costs.

We are generally obliged, to the extent permitted by law, to indemnify our current and former directors and officers who are named as defendants in these types of lawsuits. Defending against litigation may require significant attention and resources of management. Regardless of the outcome, such litigation could result in significant legal expenses.

If we are a party to material litigation and if the defenses we claim are ultimately unsuccessful, or if we are unable to achieve a favorable settlement, we could be liable for large damage awards that could have a material adverse effect on our business and consolidated financial statements.

Risks Relating to Our Business and Our Industry

If we are unable to compete in the highly competitive performance-based advertising and search marketing industries, we may experience reduced demand for our products and services.

We operate in a highly competitive and changing environment. We principally compete with other companies which offer services in the following areas:

- sales to advertisers of call and text analytics and call tracking;
- sales to advertisers of pay-for-call services;
- delivery of pay-for-call advertising to end users or customers of advertisers through mobile and online destination websites or other offline distribution outlets;
- services and outsourcing of technologies that allow advertisers to manage their advertising campaigns across multiple networks and track the success of these campaigns;
- aggregation or optimization of online advertising for distribution through mobile and online search engines and applications, product shopping engines, directories, websites or other offline outlets;
- provision of local and vertical websites containing information designed to attract users and help consumers make better, more informed local decisions, while providing targeted advertising inventory for advertisers; and
- local search sales training.

Although we currently pursue a strategy that allows us to potentially partner with all relevant companies in the industry, there are certain companies in the industry that may not wish to partner with us. Despite the fact that we currently work with several of our potential competitors, there are no guarantees that these companies will continue to work with us in the future.

We currently or potentially compete with leading search engines and digital advertising networks such as Google, Microsoft, and Verizon Media. We also compete with call analytics technology providers such as Twilio, Invoca, DialogTech, and Convirza. As we continue to advance our data analytics technologies, we anticipate facing increased competition from companies providing more broad advertising solutions, such as data management companies like Oracle. We also face competition on the call supply side, where competing mobile advertising companies like GroundTruth look to outbid, partner with or otherwise secure sources of call supply we utilize. Many of these actual or perceived competitors also currently or may in the future have business relationships with us, particularly in distribution. However, such companies may terminate their relationships with us. Furthermore, our competitors may be able to secure agreements with us on more favorable terms, which could reduce the usage of our services, increase the amount payable to our distribution partners, reduce total revenue and thereby have a material adverse effect on our business, operating results and financial condition. We expect competition to intensify in the future because current and new competitors can enter our market with little difficulty. The barriers to entering our market are relatively low. Further, if the consolidation trend continues among the larger media and search engine companies with greater brand recognition, the share of the market remaining for smaller search marketing services providers could decrease, even though the number of smaller providers could continue to increase. These factors could adversely affect our competitive position. Some of our competitors, as well as potential entrants into our market, may be better positioned to succeed in this market. They may have:

- longer operating histories;
- more management experience;
- an employee base with more extensive experience;
- better geographic coverage;
- larger customer bases;
- greater brand recognition; and
- significantly greater financial, marketing and other resources.

Currently, and in the future, as the use of the Internet and other mobile and online services increases, there will likely be larger, more well-established and well-financed entities that acquire companies and/or invest in or form joint ventures in categories or countries of interest to us, all of which could adversely impact our business. Any of these trends could increase competition and reduce the demand for any of our services.

We face competition from traditional media companies, and we may not be included in the advertising budgets of large advertisers, which could harm our operating results.

In addition to digital/online companies, we face competition from companies that offer traditional media advertising opportunities. Most large advertisers have set advertising budgets, a very small portion of which is allocated to mobile or Internet advertising. We expect that large advertisers will continue to focus most of their advertising efforts on traditional media. If we fail to convince these companies to spend a portion of their advertising budgets with us, or if our existing advertisers reduce the amount they spend on our programs, our operating results would be harmed.

If we are not able to respond to the rapid technological change characteristic of our industry, our products and services may cease to be competitive.

The market for our products and services is characterized by rapid change in business models and technological infrastructure, and we will need to constantly adapt to changing markets and technologies to provide new and competitive products and services. If we are unable to ensure that our users, advertisers, reseller partners, and distribution partners have a high-quality experience with our products and services, then they may become dissatisfied and move to competitors' products and services. Accordingly, our future success will depend, in part, upon our ability to develop and offer competitive products and services for both our target market and for applications in new markets. We may not, however, be able to successfully do so, and our competitors may develop innovations that render our products and services obsolete or uncompetitive.

Our technical systems are vulnerable to interruption and damage that may be costly and time-consuming to resolve and may harm our business and reputation.

A disaster could interrupt our services for an indeterminate length of time and severely damage our business, prospects, financial condition and results of operations. Our systems and operations are vulnerable to damage or interruption from:

- fire;
- floods;
- network failure;
- hardware failure;
- software failure;
- power loss;
- telecommunications failures;
- break-ins;
- terrorism, war or sabotage;
- computer viruses;
- denial of service attacks;
- penetration of our network by unauthorized computer users and "hackers" and other similar events;
- natural disasters, including, but not limited to, hurricanes, tornadoes, and earthquakes; and
- other unanticipated problems.

We may not have developed or implemented adequate protections or safeguards to overcome any of these events. We also may not have anticipated or addressed many of the potential events that could threaten or undermine our technology network. Any of these occurrences could cause material interruptions or delays in our business, result in the loss of data or render us unable to provide services to our customers. In addition, if a person is able to circumvent our security measures, he or she could destroy or misappropriate valuable information, including sensitive customer information, or disrupt our operations. We have deployed firewall hardware intended to thwart hacker attacks. Although we maintain property insurance and business interruption insurance, our insurance may not be adequate to compensate us for all losses that may occur as a result of a catastrophic system failure or other loss, and our insurers may not be able or may decline to do so for a variety of reasons. If we fail to address these issues in a timely manner, we may lose the confidence of our advertisers, reseller partners, and distribution partners, our revenue may decline and our business could suffer. In addition, as we expand our service offerings and enter into new business areas, we may be required to significantly modify and expand our software and technology platform. If we fail to accomplish these tasks in a timely manner, our business and reputation will likely suffer. Furthermore, some of these events could disrupt the economy and/or our customers' business activities and in turn materially affect our operating results.

Cybersecurity risks could adversely affect our business and disrupt our operations.

The threats to network and data security are increasingly diverse and sophisticated. Despite our efforts and processes to prevent breaches, our devices, as well as our servers, computer systems, and those of third parties that we use in our operations are vulnerable to cybersecurity risks, including cyber-attacks such as viruses and worms, phishing attacks, denial-of-service attacks, physical or electronic break-ins, employee theft or misuse, and similar disruptions from unauthorized tampering with our servers and computer systems or those of third parties that we use in our operations, which could lead to interruptions, delays, loss of critical data, unauthorized access to user data, and loss of customer confidence. In addition, we may be the target of email scams that attempt to acquire personal information or Company assets. Despite our efforts to create security barriers to such threats, we may not be able to entirely mitigate these risks. Any cyber-attack that attempts to obtain our or our users' data and assets, disrupt our service, or otherwise access our systems, or those of third parties we use, if successful, could adversely affect our business, operating results, and financial condition, be expensive to remedy, and damage our reputation. In addition, any such breaches may result in negative publicity, adversely affect our brand, decrease demand for our products and services, and adversely affect our operating results and financial condition.

We rely on third-party technology, platforms, carriers, communications providers, and server and hardware providers, and a failure of service by these providers could adversely affect our business and reputation.

We rely upon third-party colocation providers to host our main servers. If these providers are unable to handle current or higher volumes of use, experience any interruption in operations or cease operations for any reason or if we are unable to agree on satisfactory terms for continued hosting relationships, we would be forced to enter into a relationship with other service providers or assume hosting responsibilities ourselves. If we are forced to switch hosting facilities, we may not be successful in finding an alternative service provider on acceptable terms or in hosting the computer servers ourselves. We may also be limited in our remedies against these providers in the event of a failure of service. In the past, we have experienced short-term outages in the service maintained by one of our colocation providers.

We also rely on a select group of third party providers for components of our technology platform and support for our call-based and advertising services, such as hardware and software providers, telecommunications carriers and Voice over Internet Protocol (VoIP) providers, credit card processors and domain name registrars. As a result, key operational resources of our business are concentrated with a limited number of third party providers. A failure or limitation of service or available capacity by any of these third-party providers could adversely affect our business and reputation. Furthermore, if any of these significant providers are unable to provide the levels of service and dedicated resources over time that we required in our business, we may not be able to replace certain of these providers in a manner that is efficient, cost-effective or satisfactory to our customers, and as a result our business could be materially and adversely affected. Short term or repeat problems with any of these service providers could provide an interruption of service or service quality impairment to significant customers, which could also impact materially our revenue in any period due to credits or potential loss of significant customers.

If our security measures, including those of our vendors or partners, are breached or are perceived as not being secure, we may lose advertisers, reseller partners and distribution partners and as a result we may incur significant legal and financial exposure and suffer an adverse effect on our business.

We store and transmit data and information about our advertisers, reseller partners, distribution partners and their respective users. We also work with vendors and partners who may come into contact with certain data, such as carriers, colocation and data storage facilities and distribution partners referring callers. We deploy security measures to protect this data and information, as do third parties we utilize to assist in data and information storage. Our security measures and those of the third parties we partner with to assist in data and information storage, as well as to assist in the delivery of services to our advertisers, may suffer breaches. Security breaches of our data storage systems or our third-party colocation and technology providers we utilize to store data and information relating to our advertisers, reseller partners, distribution partners and their respective users could expose us to significant potential liability. Similarly, security breaches of our vendors and partners, or ineffective data security by our vendors or partners, may result in similar significant liability. In addition, security breaches, actual or perceived, could result in legal liability, government fines, and the loss of advertisers, reseller partners and distribution partners that could potentially have an adverse effect on our business.

We may not be able to protect our intellectual property rights, which could result in our competitors marketing competing products and services utilizing our intellectual property and could adversely affect our competitive position.

We rely on a combination of patent, copyright, trademark and trade secret laws in the United States and other jurisdictions, as well as license agreements and other contractual protections, to protect our proprietary technology. We also rely on a number of registered and unregistered trademarks to protect our brand.

As of December 31, 2018, in the United States, we have been issued 41 patents, which are estimated to expire between 2022 and 2035, and have 9 patent applications pending for examination. As of such date, in Canada we also have 1 issued patent which expires in 2026 and 1 patent application pending for examination. In addition, as of December 31, 2018, we have 16 trademarks registered in the United States, 3 trademarks pending registration in the United States, 18 trademarks registered in foreign jurisdictions and 1 trademark pending registration in Canada.

The status of any patent involves complex legal and factual questions. The scope of allowable claims is often uncertain. As a result, we cannot be sure that: (1) any patent application filed by us will result in a patent being issued; (2) that any patents issued in the future will afford adequate protection against competitors with similar technology; and (3) that the patents issued to us, if any, will not be infringed upon or designed around by others.

We further seek to protect our intellectual property rights by implementing a policy that requires our employees and independent contractors involved in development of intellectual property on our behalf to enter into agreements acknowledging that all works or other intellectual property generated or conceived by them on our behalf are our property, and assigning to us any rights, including intellectual property rights, that they may claim or otherwise have in those works or property, to the extent allowable under applicable law.

Despite our efforts to protect our technology and proprietary rights through intellectual property rights, licenses and other contractual protections, unauthorized parties may still copy or otherwise obtain and use our software and other technology. In addition, we may continue to expand our international operations, and effective intellectual property, copyright, trademark and trade secret protection may not be available or may be limited in foreign countries. Any significant impairment of our intellectual property rights could harm our business or our ability to compete. Further, companies in the Internet, communications and technology industries may own large numbers of patents, copyrights and trademarks and may frequently threaten litigation, or file suit against us based on allegations of infringement or other violations of intellectual property rights, which may adversely affect our business or financial prospects.

We may be involved in lawsuits to protect or enforce our patents, which could be expensive and time consuming.

We may initiate patent litigation against third parties to protect or enforce our patent rights, and we may be sued by others seeking to invalidate our patents or prevent the issuance of future patents. We may also become subject to interference proceedings conducted in the patent and trademark offices of various countries to determine the priority of inventions. The defense and prosecution, if necessary, of intellectual property suits, interference proceedings and related legal and administrative proceedings is costly and may divert our technical and management personnel from their normal responsibilities. We may not prevail in any of these suits. An adverse determination of any litigation or defense proceedings could put our patents at risk of being invalidated or interpreted narrowly and could put our patent applications at risk of not being issued. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. In addition, during the course of this kind of litigation, there could be public announcements of the results of hearings, motions or other interim proceedings or developments in the litigation. If securities analysts or investors perceive these results to be negative, it could have an adverse effect on the trading price of our Class B common stock.

Our quarterly results of operations might fluctuate due to seasonality, which could adversely affect our growth rate and in turn the market price of our securities.

Our quarterly results have fluctuated in the past and may fluctuate in the future due to seasonal fluctuations in the level of mobile and Internet usage and seasonal purchasing cycles of many advertisers. Our experience has shown that during the spring and summer months, mobile and Internet usage is generally lower than during other times of the year and during the latter part of the fourth quarter of the calendar year we generally experience lower call volume and reduced demand for calls from our call advertising customers. The extent to which usage and call volume may decrease during these off-peak periods is difficult to predict. Prolonged or severe decreases in usage and call volume during these periods may adversely affect our growth rate and results, and in turn, the market price of our securities. Historically, we have seen this trend generally reversing in the first quarter of the calendar year with increased mobile and Internet usage and often new budgets at the beginning of the year for many of our customers with fiscal years ending December 31. However, there can be no assurances such seasonal trends will consistently repeat each year. The current business environment and our industry has generally both resulted in, and we may continue to see, many advertisers and reseller partners reducing advertising and marketing services budgets or adjusting such budgets throughout the year, changing marketing strategies or agency affiliations, or advertisers being acquired by parent companies with alternative media initiatives, which we expect will impact our quarterly results of operations in addition to the typical seasonality seen in our industry.

We are susceptible to general economic conditions, and a downturn in advertising and marketing spending by advertisers could adversely affect our operating results.

Our operating results will be subject to fluctuations based on general economic conditions, in particular those conditions that impact advertiser-consumer transactions. Deterioration in economic conditions could cause decreases in or delays in advertising spending and reduce and/or negatively impact our short-term ability to grow our revenues. Further, any decreased collectability of accounts receivable or early termination of agreements due to deterioration in economic conditions could negatively impact our results of operations.

We depend on the growth of mobile technologies, the Internet and the Internet infrastructure for our future growth and any decrease in growth or anticipated growth in mobile and Internet usage could adversely affect our business prospects.

Our future revenue and profits, if any, depend upon the continued widespread use of mobile technologies and the Internet as an effective commercial and business medium. Factors which could reduce the widespread use of mobile technologies (including mobile devices, in particular) and the Internet include:

- possible disruptions or other damage to the mobile, Internet or telecommunications infrastructure and networks;
- failure of the individual networking infrastructures of our advertisers, reseller partners, and distribution partners to alleviate potential overloading and delayed response times;
- a decision by advertisers and consumers to spend more of their marketing dollars on offline programs;
- increased governmental regulation and taxation; and
- actual or perceived lack of data security or privacy protection.

In particular, concerns over the security of online transactions and the privacy of users, including the risk of identity theft, may inhibit the growth of Internet usage, including commercial transactions. In order for the mobile and online commerce market to develop successfully, we and other market participants must be able to transmit confidential information, including credit card information, securely over public networks. Any decrease in anticipated mobile and Internet growth and usage could have a material adverse effect on our business prospects.

We are exposed to risks associated with credit card fraud and credit payment, and we may continue to suffer losses as a result of fraudulent data or payment failure by advertisers.

We have suffered losses and may continue to suffer losses as a result of payments made with fraudulent credit card data. Our failure to control fraudulent credit card transactions could reduce our net revenue and gross margin and negatively impact our standing with applicable credit card authorization agencies. In addition, under limited circumstances, we extend credit to advertisers who may default on their accounts payable to us or fraudulently “charge-back” amounts on their credit cards for services that have already been delivered by us.

Regulation of E-Commerce, Online Tracking, Online Data Collection, and Use of the Internet may adversely affect our business and operating results.

Mobile and online search, e-commerce and related businesses face uncertainty related to new or future government regulation at the federal, state, and international levels regarding e-commerce, online tracking, online data collection, and use of the Internet. Due to the rapid growth and widespread use of the Internet, state and federal legislatures (both domestically and abroad) have enacted and may continue to enact various laws and regulations relating to the Internet. Individual states may also enact consumer protection laws that are more restrictive than the ones that already exist.

Furthermore, the application of existing laws and regulations to companies that engage in e-commerce, or otherwise interact with the Internet remains somewhat unclear. For example, as a result of the actions of advertisers in our network, we may be subject to existing laws and regulations relating to a wide variety of issues such as consumer privacy, data security, gambling, sweepstakes, advertising, promotions, defamation, pricing, taxation, financial market regulation, quality of products and services, computer trespass, spyware, adware, child protection and intellectual property ownership and infringement. In addition, it is not clear whether existing laws that require licenses or permits for certain of our advertisers’ lines of business apply to us, including those related to insurance and securities brokerage, law offices and pharmacies. Existing federal, state, and foreign laws that may affect the growth and profitability of our business include, among others:

- The Digital Millennium Copyright Act (DMCA) provides protection from copyright liability for online service providers that list or link to third party websites. We currently qualify for the safe harbor under the DMCA; however, if it were determined that we did not meet the safe harbor requirements, we could be exposed to copyright infringement litigation, which could be costly and time-consuming.

- The Children’s Online Privacy Protection Act (COPPA) restricts the online collection of personal information about children and the use of that information. The Federal Trade Commission (FTC) has the authority to impose fines and penalties upon website operators and online service providers that do not comply with the law. We do not currently offer any websites or online services “directed to children,” nor do we knowingly collect personal information from children.
- The Protection of Children from Sexual Predators Act requires online service providers to report evidence of violations of federal child pornography laws under certain circumstances.
- The Controlling the Assault of Non-Solicited Pornography and Marketing (CAN SPAM) Act of 2003 establishes requirements for those who send commercial e-mails, spells out penalties for entities that transmit noncompliant commercial e-mail and/or whose products are advertised in noncompliant commercial e-mail and gives consumers the right to opt-out of receiving commercial e-mails. The majority of the states also have adopted similar statutes governing the transmission of commercial e-mail. The FTC and the states, as applicable, are authorized to enforce the CAN-SPAM Act and the state-specific statutes, respectively. CAN-SPAM gives the Department of Justice the authority to enforce its criminal sanctions. Other federal and state agencies can enforce the law against organizations under their jurisdiction, and companies that provide Internet access may sue violators as well.
- The Electronic Communications Privacy Act prevents private entities from disclosing Internet subscriber records and the contents of electronic communications, subject to certain exceptions.
- The Computer Fraud and Abuse Act and other federal and state laws protect computer users from unauthorized computer access/hacking, and other actions by third parties which may be viewed as a violation of privacy. Courts may apply each of these laws in unintended and unexpected ways. As a company that provides services over the Internet as well as call recording and call tracking services, we may be subject to an action brought under any of these or future laws.
- Among the types of legislation currently being considered at the federal and state levels are consumer laws regulating for the use of certain types of software applications or downloads and the use of “cookies.” These proposed laws are intended to target specific types of software applications often referred to as “spyware,” “invasiveware” or “adware,” and may also cover certain applications currently used in the online advertising industry to serve and distribute advertisements. In addition, the FTC has sought inquiry regarding the implementation of a “do-not-track” requirement. Federal legislation is also expected to be introduced that would regulate “online behavioral advertising” practices. If passed, these laws would impose new obligations for companies that use such software applications or technologies. At least one state already has enacted a law, which went into effect in January 2014, regarding online tracking.

Many Internet services are automated, and companies such as ours may be unknowing conduits for illegal or prohibited materials. It is possible that some courts may impose a strict liability standard or require such companies to monitor their customers’ conduct. Although we would not be responsible or involved in any way in such illegal conduct, it is possible that we would somehow be held responsible for the actions of our advertisers or distribution partners.

We may also be subject to costs and liabilities with respect to privacy issues. Several companies have incurred penalties for failing to abide by the representations made in their public-facing privacy policies. In addition, several states have passed laws that require businesses to implement and maintain reasonable security procedures and practices to protect sensitive personal information and to provide notice to consumers in the event of a security breach. Further, it is anticipated that additional federal and state privacy-related legislation will be enacted. Such legislation could negatively affect our business. In addition, foreign countries may enact laws that could negatively impact our business and/or may prosecute us for violating existing laws. Such laws might include EU member country conforming legislation under applicable EU Privacy, eCommerce, Data Protection Directives (and similar legislation in other countries where we may have operations), and the recently enacted EU General Data Protection Regulation which went into full effect in May 2018 and which supersedes the current EU data protection regulation, which is directly applicable to all member states and which is expected to result in substantial changes to our compliance obligations and a significant increase in potential administrative fines for non-compliance. Any costs incurred in addressing foreign laws could negatively affect the viability of our business. Our exposure to this risk will increase to the extent we expand our operations internationally.

Federal, state, and foreign regulation of telecommunications may adversely affect our business and operating results.

We provide information and analytics services to certain advertisers and reseller partners that may include information services. In connection therewith, we obtain certain telecommunications products and services from carriers in order to deliver these packages of information and analytic services.

Telecommunications laws and regulations (and interpretations thereof) are evolving in response to rapid changes in the telecommunications industry. If our carrier partners were to be subject to any changes in applicable law or regulation (or interpretations thereof), or additional taxes or surcharges, then we in turn may be subject to increased costs for their products and services or receive products and services that may be of less value to our customers, which in turn could adversely affect our business and operating results. Furthermore, our call recording and pay-for-call services may directly subject us to certain telecommunications-related regulations. Finally, in the event that any federal or state regulators were to expand the scope of applicable laws and

regulations or their application to include certain end users and information service providers, then our business and operating results could also be adversely affected. The following existing and possible future federal and state laws could impact the growth and profitability of our business:

- The Communications Act of 1934, as amended by the Telecommunications Act of 1996 (the “Act”), and the regulations promulgated by the Federal Communications Commission under Title II of the Act, may impose federal licensing, reporting and other regulatory obligations on the Company. To the extent we contract with and use the networks of voice over IP service providers, new legislation or FCC regulation in this area could restrict our business, prevent us from offering service or increase our cost of doing business. There are an increasing number of regulations and rulings that specifically address access to commerce and communications services on the Internet, including IP telephony. We are unable to predict the impact, if any, that future legislation, legal decisions or regulations concerning voice services offered via the Internet may have on our business, financial condition, and results of operations.
- The U.S. Congress, the FCC, state legislatures or state agencies may target, among other things, access or settlement charges, imposing taxes related to Internet communications, imposing tariffs or other regulations based on encryption concerns, or the characteristics and quality of products and services that we may offer. Any new laws or regulations concerning these or other areas of our business could restrict our growth or increase our cost of doing business.
- The FCC has initiated a proceeding regarding the regulation of broadband services. The increasing growth of the broadband IP telephony market and popularity of broadband IP telephony products and services heighten the risk that the FCC or other legislative bodies will seek to regulate broadband IP telephony and the Internet. In addition, large, established telecommunication companies may devote substantial lobbying efforts to influence the regulation of the broadband IP telephony market, which may be contrary to our interests.
- There is risk that a regulatory agency will require us to conform to rules that are unsuitable for IP communications technologies or rules that cannot be complied with due to the nature and efficiencies of IP routing, or are unnecessary or unreasonable in light of the manner in which we offer voice-related services such as call recording and pay-for-call services to our customers.
- Federal and state telemarketing laws including the Telephone Consumer Protection Act (“TCPA”) which limits the use of autodialing systems, artificial or prerecorded voice messages, SMS text messages and fax machines, the Telemarketing Sales Rule, the Telemarketing Consumer Fraud and Abuse Prevention Act and the rules and regulations promulgated thereunder. In recent years, the TCPA has become a fertile source for both individual and class action lawsuits and regulatory actions. Specifically, the TCPA restricts telemarketing and the use of automatic SMS text messages without proper consent. The scope and interpretation of the laws that are or may be applicable to the delivery of text messages are continuously evolving and developing. If we do not comply with these laws or regulations or if we become liable under these laws or regulations due to the failure of our customers to comply with these laws by obtaining proper consent, we could face liability.
- Laws affecting telephone call recording and data protection, such as consent and personal data statutes. Under the federal Wiretap Act, at least one party taking part in a call must be notified if the call is being recorded. Under this law, and most state laws, there is nothing illegal about one of the parties to a telephone call recording the conversation. However, several states (i.e., California, Connecticut, Florida, Illinois, Maryland, Massachusetts, Michigan, Montana, Nevada, New Hampshire, Pennsylvania and Washington) require that all parties consent when one party wants to record a telephone conversation. The telephone recording laws in other states, like federal law, require only one party to be aware of the recording. A Wiretap Act violation is a Class D felony; the maximum authorized penalties for a violation of section 2511(1) of the Wiretap Act are imprisonment of not more than five years and a fine under Title 18. Authorized fines are typically not more than \$250,000 for individuals or \$500,000 for an organization, unless there is a substantial loss. State laws impose similar penalties.
- The Communications Assistance for Law Enforcement Act may require that we undertake material modifications to our platforms and processes to permit wiretapping and other access for law enforcement personnel.
- Under various Orders of the Federal Communications Commission, we may be required to make material retroactive and prospective contributions to funds intended to support Universal Service, Telecommunications Relay Service, Local Number Portability, the North American Numbering Plan and the budget of the Federal Communications Commission.
- Laws in most states of the United States of America may require registration or licensing of one or more of our subsidiaries, and may impose additional taxes, fees or telecommunications surcharges on the provision of our services which we may not be able to pass through to customers.
- Our international operations may expose us to telecommunications regulations and data and privacy regulations (including the EU General Data Protection Regulation) in the countries where we are operating and these regulations could negatively affect the viability of our business in those regions.
- For our domestic business, we expect the trend towards enhanced regulation and personal rights applicable to the collection, use, storage and sharing of personal information to continue. For example, California recently enacted the California Consumer Privacy Act (“CCPA”), which takes effect on January 1, 2020. The CCPA establishes requirements for businesses and grants individuals with rights similar to those contained in the GDPR. The CCPA gives California

residents expanded rights to access and delete their personal information, opt out of certain personal information sharing, and receive detailed information about how their personal information is used. Like the GDPR, the CCPA provides for civil penalties for violations, as well as a private right of action for data breaches that is expected to increase data breach litigation. Some observers have noted that the CCPA could mark the beginning of a trend toward more stringent state privacy legislation in the U.S., which could adversely affect our business.

State and local governments may in the future be permitted to levy additional taxes on Internet access and electronic commerce transactions, which could result in a decrease in the level of usage of our services. In addition, we may be required to pay additional income, sales, or other taxes.

The federal government has placed a ban for now on state and local governments' imposition of new taxes on Internet access or electronic commerce transactions through the Internet Tax Freedom Act. The proposed Marketplace Fairness Act, if enacted into law, would allow states to require online and other out of state merchants to collect and remit sales and use tax on products and services that they may sell. Additionally, a June 2018 U.S. Supreme Court decision held that states can require remote sellers to collect state and local sales taxes. An increase in taxes may make electronic commerce transactions less attractive for advertisers and businesses, which could result in a decrease in the level of usage of our services. Furthermore, from time to time, various state, federal and other jurisdictional tax authorities undertake reviews of us and our filings. In evaluating the exposure associated with various tax filing positions, we may on occasion accrue charges for probable exposures. We cannot predict the outcome of any of these reviews.

Risks Relating to Ownership of our Class B common stock

Our Class B common stock prices have been and are likely to continue to be highly volatile.

The trading prices of our Class B common stock have been and are likely to continue to be highly volatile and subject to wide fluctuations and has more recently declined significantly. Our stock prices may fluctuate in response to a number of events and factors, which may be the result of our business strategy or events beyond our control, including:

- actual or anticipated fluctuations in our operating results;
- developments concerning proprietary rights, including patents, by us or a competitor;
- announcements by us or our competitors of significant contracts, acquisitions, financings, commercial relationships, joint ventures or capital commitments;
- loss of senior management or other key personnel;
- registration of additional shares of Class B common stock in connection with acquisitions;
- lawsuits initiated against us or lawsuits initiated by us;
- announcements of acquisitions or technical innovations;
- potential loss or reduced contributions from distribution partners, reseller partners and agencies, or advertisers;
- significant volatility in the market price and trading volume of technology companies in general and of companies in our industry in particular;
- changes in growth or earnings estimates or recommendations by analysts;
- changes in the market valuations of similar companies;
- changes in our industry and the overall economic environment;
- volume of shares of Class B common stock available for public sale, including upon conversion of Class A common stock or upon exercise of stock options;
- Class B common stock repurchases under our share repurchase program;
- sales and purchases of stock by us or by our stockholders, including sales by certain of our executive officers and directors pursuant to written pre-determined selling and purchase plans under Rule 10b5-1 of the Securities Exchange Act of 1934, as amended (the "Exchange Act");
- short sales, hedging and other derivative transactions on shares of our Class B common stock; and
- an adverse impact on us from any of the other risks cited in this Risk Factors section.

In addition, the stock market in general, and the NASDAQ Global Select Market and the market for mobile and online commerce companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of the listed companies. These broad market and industry factors may seriously harm the market price of our Class B common stock, regardless of our operating performance. In the past, following periods of volatility in the market, securities class action litigation has often been instituted against these companies.

Litigation against us, whether or not judgment is entered against us, could result in substantial costs and potentially economic loss, and a diversion of our management's attention and resources, any of which could seriously harm our financial condition. Additionally, there can be no assurance that an active trading market of our Class B common stock will be sustained.

If securities analysts do not continue to publish research or publish negative research about our business, our stock price and trading volume could decline.

The trading market for our Class B common stock depends in part on the research and reports that securities analysts publish about us or our business. If one or more of the analysts who covers us downgrades our stock or publishes negative research about our business, our stock price would likely decline. If one or more of these analysts ceases coverage of our company or fails to publish reports on us regularly, we could lose visibility in the market for our stock and demand for our stock could decrease, which could cause our stock price or trading volume to decline.

Our founder controls the outcome of stockholder voting, and there may be an adverse effect on the price of our Class B common stock due to the disparate voting rights of our Class A common stock and our Class B common stock.

As of September 30, 2019, Russell C. Horowitz, our founder, beneficially owned 100% of the outstanding shares of our Class A common stock, which shares represented 75% of the voting power of all outstanding shares of our capital stock. The holders of our Class A common stock and Class B common stock have identical rights except that the holders of our Class B common stock are entitled to one vote per share, while holders of our Class A common stock are entitled to twenty-five votes per share on all matters to be voted on by stockholders. This concentration of control could be disadvantageous to our other stockholders with interests different from those of our founder. This difference in the voting rights of our Class A common stock and Class B common stock could adversely affect the price of our Class B common stock to the extent that investors or any potential future purchaser of our shares of Class B common stock give greater value to the superior voting rights of our Class A common stock. Further, as long as our founder has a controlling interest, he will continue to be able to elect all or a majority of our board of directors and generally be able to determine the outcome of all corporate actions requiring stockholder approval. As a result, our founder will be in a position to continue to control all fundamental matters affecting our company, including any merger involving, sale of substantially all of the assets of, or change in control of, our company. The ability of our founder to control our company may result in our Class B common stock trading at a price lower than the price at which such stock would trade if our founder did not have a controlling interest in us. This control may deter or prevent a third-party from acquiring us which could adversely affect the market price of our Class B common stock.

Anti-takeover provisions may limit the ability of another party to acquire us, which could cause our stock price to decline.

Our certificate of incorporation, as amended, our by-laws, as amended, and Delaware law contain provisions that could discourage, delay or prevent a third party from acquiring us, even if doing so may be beneficial to our stockholders. In addition, these provisions could limit the price investors would be willing to pay in the future for shares of our Class B common stock. The following are examples of such provisions in our certificate of incorporation, as amended, or our by-laws, as amended:

- the authorized number of our directors can be changed only by a resolution of our board of directors;
- advance notice is required for proposals that can be acted upon at stockholder meetings;
- there are limitations on who may call stockholder meetings; and
- our board of directors is authorized, without prior stockholder approval, to create and issue “blank check” preferred stock.

We are also subject to Section 203 of the Delaware General Corporation Law, which provides, subject to enumerated exceptions, that if a person acquires 15% or more of our voting stock, the person is an “interested stockholder” and may not engage in “business combinations” with us for a period of three years from the time the person acquired 15% or more of our voting stock. The application of Section 203 of the Delaware General Corporation Law could have the effect of delaying or preventing a change of control of our company.

We may not pay dividends on our Class B common stock in the future.

Under Delaware law, dividends to stockholders may be made only from the surplus of a company, or, in certain situations, from the net profits for the current fiscal year or the fiscal year before which the dividend is declared. We declared and paid a special dividend in the last quarter of 2017 and the first quarter of 2018, respectively. Special dividends generally result in a reduction in stock price with the dividend distributed. In addition, we paid a quarterly dividend on our Class B common stock from November 2006 through May 2015. Our ability to pay dividends is dependent upon a variety of factors, including our financial results, liquidity and financial condition and capital requirements. There is no assurance that we will pay dividends in the future. Furthermore, the payment by us of special dividends or dividends in general may have an impact on our stock price.

FORWARD LOOKING STATEMENTS

This prospectus, including the information incorporated by reference, contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements other than statements of historical facts contained in this prospectus, including statements regarding the benefits and risks associated with our acquisitions, our future operating results, financial position, and business strategy, expectations regarding our growth and the growth of the industry in which we operate, and plans and objectives of management for future operations, are forward-looking statements. The words “believe,” “may,” “estimate,” “continue,” “anticipate,” “intend,” “expect” and similar expressions, as they relate to us, are intended to identify forward-looking statements.

Any or all of our forward-looking statements in this prospectus may turn out to be inaccurate. We have based these forward-looking statements largely on our current expectations and projections about future events and financial trends that we believe may affect our financial condition, results of operations, business strategy and financial needs. They may be affected by inaccurate assumptions we might make or by known or unknown risks and uncertainties, including the risks, uncertainties and assumptions described in “Risk Factors.” In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this prospectus may not occur as contemplated, and actual results could differ materially from those anticipated or implied by the forward-looking statements.

Market data and forecasts used in this prospectus have been obtained from independent industry sources, unless otherwise noted. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and the additional uncertainties accompanying any estimates of future market size.

You should not unduly rely on these forward-looking statements, which speak only as of the date of this prospectus. Unless required by law, we undertake no obligation to publicly update or revise any forward-looking statements to reflect new information or future events or otherwise. You should, however, review the factors and risks we describe in the reports we will file from time to time with the SEC after the date of this prospectus. See “Where You Can Find More Information.”

USE OF PROCEEDS

We will not receive any proceeds from the sale of the shares of Class B common stock by the selling stockholders.

SELLING STOCKHOLDERS

We are registering for resale a total of up to 848,898 shares of Class B common stock held by the selling stockholders who acquired shares of our Class B common stock in connection with our acquisition of SITA Laboratories, Inc. (d/b/a Callcap) (“Callcap”) on November 20, 2018 which represents those shares issued on the first annual anniversary of the closing date. The table below sets forth, to the Company’s knowledge, the following information regarding the selling stockholders as of December 9, 2019:

- The name of the selling stockholders;
- The number of shares of our Class B common stock owned by the selling stockholders on the date of this prospectus prior to the offering for resale of any of the shares being registered by the registration statement of which this prospectus is a part;
- The number of shares of our Class B common stock that may be offered for resale by the selling stockholders pursuant to this prospectus;
- The number of shares of our Class B common stock to be held by the selling stockholders after the resale of the offered shares; and
- The percent of ownership of our Class B common stock of each selling stockholder, if such percentage exceeds one percent of our total outstanding Class B common stock.

Name of Beneficial Owner	Beneficial Ownership Prior to Offering		Beneficial Ownership After Offering	
	Number of Shares	Shares to be Sold	Number of Shares ⁽¹⁾	Percent of Class B Shares
The Sunny P. Smith Revocable Trust	670,938	670,938	—	1.75%
William P. Steinhoff	162,291	161,291	1,000	0
Joe M. and Stephany J. Applegate Revocable Trust	16,669	16,669	—	0
	849,898	848,898	1,000	1.75%

⁽¹⁾ Assumes that all the shares of Class B common stock that may be offered hereunder are sold and the selling stockholders neither acquire nor dispose of any other shares of our Class B common stock before the completion of this offering.

The information regarding the selling stockholders may change from time to time. If required, we will describe these changes in one or more prospectus supplements.

PLAN OF DISTRIBUTION

The selling stockholders may use this prospectus to sell the shares at any time while the prospectus is in effect, unless we have notified the selling stockholders that the prospectus is not available at that particular time except that only 84,890 shares will be immediately saleable upon effectiveness of the registration statement and the remaining 764,008 shares will become saleable hereunder upon their release from escrow six (6) months from November 20, 2019 assuming no pending claims thereunder. The selling stockholders will determine if, when and how it will sell the shares it owns. Any sales may occur in one or more of the following types of transactions (including block transactions):

- transactions on the Nasdaq Global Select Market or any other organized market or quotation system where the shares may be traded,
- privately negotiated transactions between a selling stockholder and a purchaser,
- through trading plans entered into by a selling stockholder pursuant to Rule 10b5-1 under the Securities Exchange Act of 1934, as amended, that are in place at the time of an offering pursuant to this prospectus and any applicable prospectus supplement hereto that provide for periodic sales of their securities on the basis of parameters described in such trading plans, or
- transactions effected with or through a broker-dealer acting as either agent or principal.

These transactions may involve the transfer of the shares upon exercise or settlement of put or call options, or the delivery of the shares to replace shares that were previously borrowed from another stockholder or a combination of such methods. If a broker-dealer is used in the sale of shares, that person may solicit potential purchasers. The shares may also be transferred as a gift or as a result of a pledge, or may be sold to a broker-dealer acting as principal. These persons may then sell the shares to another person, either directly or through another broker-dealer, subject to compliance with the requirements of the Securities Act.

The price at which sales of the shares occur may be based on market prices or may be negotiated between the parties, and the consideration may be cash or another form negotiated between the parties. Broker-dealers acting as agents or principals may be paid compensation in the form of discounts, concessions or commissions from the selling stockholders and/or from the purchasers of the shares, or both. Brokers or dealers may be deemed to be “underwriters” within the meaning of the Securities Act. Any profits on the resale of shares by a broker-dealer acting as principal might be deemed to be underwriting discounts or commissions under the Securities Act. Discounts, concessions, commissions and similar selling expenses, if any, that can be attributed to the sale of shares will be paid by the selling stockholders and/or the purchasers. We have agreed to pay certain of the costs, expenses and fees of preparing, filing and maintaining this prospectus and the registration statement of which this prospectus is a part, but we will not receive any proceeds from sale of these shares. The selling stockholders may agree to indemnify any agent, dealer or broker-dealer that participates in transactions involving sales of the shares if liabilities are imposed on it under the Securities Act.

The selling stockholders have advised us that he, she or it has not entered into any agreements, understandings or arrangements with any underwriters or broker-dealers regarding the sale of such shares, nor is there an underwriter or coordinating broker acting in connection with a proposed sale of shares by any selling stockholder. If we are notified by any selling stockholder that any material arrangement has been entered into with a broker-dealer for the sale of shares, if required, we will file a supplement to this prospectus. If the selling stockholders use this prospectus for any sale of the shares, they will be subject to the prospectus delivery requirements of the Securities Act. The anti-manipulation rules of Regulation M under the Securities Exchange Act of 1934 may apply to sales of our Class B common stock and activities of the selling stockholders.

We are contractually required to use commercially reasonable best efforts to maintain the effectiveness of the registration statement with respect to the shares of Class B common stock offered hereunder by the selling stockholders for a period of six months from the date the registration statement becomes effective (plus the aggregate number of days, if any, during which sales may be suspended while the suspension right is in effect).

LEGAL MATTERS

Certain legal matters with respect to the shares of Class B common stock offered hereby will be passed upon for us by Michelle Paterniti, General Counsel and Secretary of Marchex. Ms. Paterniti owns, or has the right to acquire, a number of shares of Marchex’s Class B common stock which represents less than 0.1% of Marchex’s outstanding Class B common stock.

EXPERTS

The consolidated financial statements appearing in our Annual Report on Form 10-K of Marchex, Inc. for the year ended December 31, 2018, and the effectiveness of internal control over financial reporting as of December 31, 2018, of Marchex, Inc. have been audited by Moss Adams LLP, an independent registered public accounting firm, as stated in its reports, which are incorporated herein by reference. Such consolidated statements have been so incorporated in reliance upon the reports of such firm upon the authority of such firm as experts in accounting and auditing.

The balance sheets of SITA Laboratories, Inc. d/b/a Callcap as of December 31, 2017 and 2016 and the related statements of earnings, changes in stockholders' equity (deficit), and cash flows for the years then ended, incorporated by reference in this prospectus and elsewhere in the registration statement have been so incorporated by reference in reliance upon the report of Grant Thornton LLP, independent certified public accountants, upon the authority of such firm as experts in accounting and auditing.

WHERE YOU CAN FIND MORE INFORMATION

We file periodic reports, proxy statements and other information with the Securities and Exchange Commission. You may inspect and copy these reports and other information at the SEC's public reference facilities in Washington, D.C. (located at 100 F Street, N.E., Washington, D.C. 20549). You can also obtain copies of these materials from the SEC's public reference section (located at 100 F Street, N.E., Washington, D.C. 20549) at prescribed rates. Please call the SEC at 1-800-SEC-0330 for further information about the public reference rooms. The SEC also maintains a web site at <http://www.sec.gov>. This site contains reports, proxy and information statements and other information about companies that file these reports electronically with the SEC. Our SEC filings are also available on our website at <http://www.marchex.com>.

INCORPORATION OF DOCUMENTS BY REFERENCE

The SEC allows us to incorporate by reference the information that we file with the SEC, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is considered to be part of this prospectus. These documents may include periodic reports, such as Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, as well as Proxy Statements. Any documents that we subsequently file with the SEC will automatically update and replace the information previously filed with the SEC. Thus, for example, in the case of a conflict or inconsistency between information set forth in this prospectus and information incorporated by reference into this prospectus, you should rely on the information contained in the document that was filed later. Any documents that we file with the SEC after the date of this registration statement and prior to the effectiveness of this registration statement shall be deemed to be incorporated by reference into this prospectus.

This prospectus incorporates by reference the documents listed below that we previously have filed with the SEC and any additional documents that we may file with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Exchange Act (excluding portions thereof deemed to be "furnished" to the SEC pursuant to Item 2.02, Item 7.01 or Item 9.01 of a Current Report on Form 8-K) between the date of this prospectus and the termination of the offering of the securities:

1. [Our Annual Report on Form 10-K for the year ended December 31, 2018](#);
2. [Our Annual Report on Form 10-K/A for the year ended December 31, 2018](#);
3. All other reports filed pursuant to Section 13(a) or 15(d) of the Exchange Act since the end of the fiscal year covered by our Annual Report referred to in (1) above; and
4. The description of our Class B common stock contained in our registration statement on [Form 8-A, filed on March 30, 2004](#).

We have also filed a registration statement on Form S-3 with the SEC, of which this prospectus forms a part. This prospectus does not contain all of the information set forth in the registration statement. You should read the registration statement for further information about us and about our Class B common stock.

We will provide a copy of these filings to each person, including any beneficial owner, to whom we deliver this prospectus, upon written or oral request. You may request a copy of these filings at no cost by writing or telephoning us at the following address:

Marchex, Inc.
520 Pike Street, Suite 2000
Seattle, Washington 98101
(206) 331-3300
Attention: Michelle D. Paterniti, General Counsel and Secretary

You should rely only on the information contained in this prospectus. We have authorized no one to provide you with different information. These securities are not offered in any state where the offer is not permitted. You should not assume that the information in this prospectus is accurate as of any date other than the date on the front of this prospectus.

DISCLOSURE OF COMMISSION POSITION ON INDEMNIFICATION FOR SECURITIES ACT LIABILITIES

Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers or persons controlling the registrant pursuant to the foregoing provisions, the registrant has been informed that in the opinion of the Securities and Exchange Commission such indemnification is against public policy and is therefore unenforceable.

PROSPECTUS

December , 2019

PART II. INFORMATION NOT REQUIRED IN PROSPECTUS

Item 14. Other Expenses Of Issuance And Distribution

The following table sets forth all expenses payable by us in connection with the offering of our Class B common stock being registered hereby. All amounts are estimated except the SEC registration fee.

Filing Fees—SEC Registration Fee	\$422.02
Accounting Fees and Expenses	\$15,000.00
Total	<u>\$15,422.02</u>

Item 15. Indemnification of Directors and Officers

The certificate of incorporation and the by-laws of the registrant provide that the registrant shall indemnify its officers, directors and certain others to the maximum extent permitted by the General Corporation Law of the State of Delaware.

Section 145 of the General Corporation Law of the State of Delaware provides in relevant part as follows:

(a) A corporation shall have power to indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative) other than an action by or in the right of the corporation) by reason of the fact that the person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by the person in connection with such action, suit or proceeding if the person acted in good faith and in a manner the person reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding had no reasonable cause to believe the person's conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which the person reasonably believed to be in or not opposed to the best interests of the corporation, and, with respect to any criminal action or proceeding, had reasonable cause to believe that the person's conduct was unlawful.

(b) A corporation shall have power to indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the corporation to procure a judgment in its favor by reason of the fact that the person is or was a director, officer, employee or agent of the corporation, or is or was serving at the request of the corporation as a director, officer, employee or agent of another corporation, partnership, joint venture, trust or other enterprise against expenses (including attorneys' fees) actually and reasonably incurred by the person in connection with the defense or settlement of such action or suit if the person acted in good faith and in a manner the person reasonably believed to be in or not opposed to the best interest of the corporation and except that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable to the corporation unless and only to the extent that the Court of Chancery or the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the Court of Chancery or such other court shall deem proper.

The General Corporation Law does not allow for the elimination or limitation of liability of a director: (1) for any breach of a director's duty of loyalty to the corporation or its stockholders; (2) acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law; (3) arising under Section 174 thereof; or (4) for any transaction from which the director derived an improper personal benefit. The General Corporation Law provides further that the indemnification permitted thereunder shall not be deemed exclusive of any rights to which the directors and officers may be entitled under the corporation's bylaws, any agreement, a vote of stockholders or otherwise.

In addition, pursuant to our certificate of incorporation and by-laws, we shall indemnify our directors and officers against expenses (including judgments or amounts paid in settlement) incurred in any action, civil or criminal, to which any such person is a party by reason of any alleged act or failure to act in his capacity as such, except as to a matter as to which such director or officer shall have been finally adjudged not to have acted in good faith in the reasonable belief that his action was in the best interest of the corporation.

We maintain directors and officers liability insurance for the benefit of our directors and certain of our officers.

We have entered into indemnification agreements with each of our directors and our executive officers.

Item 16. Exhibits

Please see the exhibit index preceding the signature page of this registration statement.

Item 17. Undertakings

(a) The undersigned registrant hereby undertakes:

(1) To file, during any period in which offers or sales are being made, a post-effective amendment to this registration statement:

(i) To include any prospectus required by Section 10(a)(3) of the Securities Act of 1933;

(ii) To reflect in the prospectus any facts or events arising after the effective date of the registration statement (or the most recent post-effective amendment thereof) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration statement. Notwithstanding the foregoing, any increase or decrease in the volume of securities offered (if the total dollar value of securities offered would not exceed that which was registered) and any deviation from the low or high end of the estimated maximum offering range may be reflected in the form of prospectus filed with the Securities and Exchange Commission pursuant to Rule 424(b) if, in the aggregate, the changes in volume and price represent no more than a 20% change in the maximum aggregate offering price set forth in the "Calculation of Registration Fee" table in the effective registration statement; and

(iii) To include any material information with respect to the plan of distribution not previously disclosed in the registration statement or any material change to such information in the registration statement;

provided, however, that paragraphs (i), (ii) and (iii) above do not apply if the information required to be included in a post-effective amendment by those paragraphs is contained in reports filed with or furnished to the Securities and Exchange Commission by the registrant pursuant to Section 13 or Section 15(d) of the Securities Exchange Act of 1934 that are incorporated by reference in the registration statement, or is contained in a form of prospectus filed pursuant to Rule 424(b) that is part of the registration statement.

(2) That, for the purpose of determining any liability under the Securities Act of 1933, each such post-effective amendment shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(3) To remove from registration by means of a post-effective amendment any of the securities being registered which remain unsold at the termination of the offering.

(4) That, for the purpose of determining liability under the Securities Act of 1933 to any purchaser, each prospectus filed by the registrant pursuant to Rule 424(b)(3) shall be deemed to be part of the registration statement as of the date the filed prospectus was deemed part of and included in the registration statement.

(b) The undersigned registrant hereby undertakes that, for purposes of determining any liability under the Securities Act of 1933, each filing of the registrant's annual report, pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (and, where applicable, each filing of an employee benefit plan's annual report pursuant to Section 15(d) of the Securities Exchange Act of 1934) that is incorporated by reference in the registration statement shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

(c) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers or controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Securities Act of 1933 and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Exchange Act and will be governed by the final adjudication of such issue.

Re: Registration Statement on Form S-3

Ladies and Gentlemen:

As General Counsel and Secretary of Marchex, Inc., a Delaware corporation (the "Company" or "Marchex"), I am providing this opinion in connection with a Registration Statement on Form S-3 (the "Registration Statement") filed with the Securities and Exchange Commission (the "Commission") under the Securities Act of 1933, as amended (the "Securities Act"), for the registration of an aggregate of 848,898 shares of Class B common stock, \$0.01 par value per share (the "Shares"), of the Company. All of the Shares are being registered on behalf of certain selling stockholders of the Company.

I or a member of the Company's Legal Department have examined signed copies of the Registration Statement filed with the Commission. I or a member of the Company's Legal Department have also examined and relied upon minutes of meetings of the stockholders and the Board of Directors of the Company, the Certificate of Incorporation and By-Laws of the Company, each as restated and/or amended to date, and such other documents as we have deemed necessary for purposes of rendering the opinions hereinafter set forth.

In my examination or in the examination by a member of the Company's Legal Department of the foregoing documents, I or a member of the Company's Legal Department have assumed the genuineness of all signatures, the authenticity of all documents submitted to either of us as originals, the conformity to original documents of all documents submitted to either of us as copies, the authenticity of the originals of such latter documents and the legal competence of all signatories to such documents.

I express no opinion herein as to the laws of any state or jurisdiction other than the General Corporation Law of the State of Delaware and the federal laws of the United States of America.

Based upon and subject to the foregoing, I am of the opinion that the Shares have been duly authorized and are validly issued, fully paid and nonassessable.

Please note that I am opining only as to the matters expressly set forth herein, and no opinion should be inferred as to any other matters. This opinion is based upon currently existing statutes, rules, regulations and judicial decisions, and I disclaim any obligation to advise you of any change in any of these sources of law or subsequent legal or factual developments which might affect any matters or opinions set forth herein.

I hereby consent to the filing of this opinion with the Commission as an exhibit to the Registration Statement in accordance with the requirements of Item 601(b)(5) of Regulation S-K under the Securities Act and to the use of my name therein and in the related prospectus under the caption "Legal Matters." In giving such consent, I do not hereby admit that I am in the category of persons whose consent is required under Section 7 of the Securities Act or the rules and regulations of the Commission.

Very truly yours,

By: /s/ MICHELLE
D. PATERNITI
Michelle D.
Paterniti, Esq.
*General
Counsel and
Secretary*

Consent of Independent Registered Public Accounting Firm

We consent to the incorporation by reference in this Registration Statement on Form S-3 of Marchex, Inc. of our reports dated March 18, 2019, relating to the consolidated financial statements and the effectiveness of internal control over financial reporting of Marchex, Inc., included in the Annual Report on Form 10-K of Marchex, Inc. for the year ended December 31, 2018, filed with the Securities and Exchange Commission, and to the reference to our firm under the caption “Experts” in the Prospectus that is part of this Registration Statement.

/s/ Moss Adams LLP
